

STEEL FRAMES

Hurley Screen Corp. Steel Frames are available in a wide variety of styles and, as always, we welcome any custom design requirements you may have. We have drawn on our years of experience in the field to design a frame that is economical, durable, and easy to install. This frame has been engineered to withstand all the demands that a frame is faced with during its use. All frames are constructed of two inch M1020 structural steel angle. Sufficient vertical and diagonal bracing has been placed at strategic points to insure the strength of the frame and to allow for the placement of speaker stands behind the frame. Screens are mounted using Hurley's SS-80 spring. All frames are painted with non-reflective black paint prior to shipment. Rigorous final inspection, which includes fabrication, guarantees ease of assembly and installation at the job site. Please use the following model designations where applicable.

STEEL FRAME TYPE SF-1

SUPPORTED FROM CEILING AND
BRACED TO REAR WALL

STEEL FRAME TYPE SF-2

SUPPORTED FROM FLOOR AND
BRACED TO REAR WALL
